

Suggestions for Representing Learning

Although the title of the challenge is **Its Write for Communities**, the following ideas are suggestions that can be used as choices in student assignments for the challenge. We will accept different forms of representation for the challenge. It is not necessary to limit the students to writing if you would prefer to use other formats. We suggest that once you have decided on the outcomes for the lesson, prepare a rubric, based on those outcomes, that students will need to address in their representation. Rubrics based on curricular outcomes can be applied to every form of representation. Teachers and/or students can add specific rubrics for the representation such as writing conventions, aesthetics, and presentation skills.

Ideally, students should display, perform, and share their projects with other people.

Please send us any ideas for representing learning that you would like to share with other teachers and we will gladly add it to the list. You may email them to: seeds@seedsfoundation.ca
