

# Greenhouse Effect - 1

This and the following diagrams trace 100 units of solar energy entering Earth's atmosphere. 31% is reflected back into space by the clouds, aerosols and Earth's surface.

# Greenhouse Effect - 3

Energy absorbed by the surface is converted to heat and warms the atmosphere. Greenhouse gases trap some of this heat and delay it from leaving the atmosphere.

# Climate change issues

## What are the issues?

- Scientific
- Economic
- Social
- Environmental
- Political

## What do the issues mean to us?

- Changes in lifestyle and personal choices
- An uncertain future
- Challenges and opportunities
